JEBZTER CATACUTAN

ASPIRING FULL-STACK DEVELOPER | IT INTERNSHIP APPLICANT

ABOUT ME

Fourth-year BS Information Technology student seeking an IT internship in software development. Sole full-stack developer of Bitulok Express, a capstone delivery platform covering web and mobile apps, Node.js services, and a Firebase database. Eager to contribute to real projects and learn from an experienced development team.

PROJECT EXPERIENCE

Bitulok Express
2026–2027

Full-Stack Developer | Capstone Project

Food and goods ordering and delivery platform for Gabaldon, Nueva Ecija.

- Built customer and rider mobile apps (React Native) and web dashboards (React) for merchants and administrators.
- Developed account management, menus, checkout, order processing, rider assignment, delivery tracking, and admin monitoring.
- Connected the React and React Native interfaces to Node.js and Firebase services, supporting COD and QR Ph payment options.

Tech: React, React Native, Node.js, Firebase, Firestore

PHINMA AU Student Credential System
2024–2025

Project Contributor

- Collaborated with a team on the design and implementation of an application for managing student credentials.

PMCCA Hospital Management System
2024

Backend & Database Developer

- Developed backend and database components to support hospital records and data management.

STRENGTHS

Problem-solving • Attention to detail
Willingness to learn • Team collaboration
